

Managed AP for Workday

A fully managed service delivered inside your Workday tenant

Workday Financial Management is your system of record. But capturing invoices, coding them correctly, chasing exceptions, and managing vendor follow-up still falls on your team. These time-consuming tasks can delay close and put your data at risk.

The typical fixes, like adding headcount or bolting on third-party tools, don't scale. They can actually make matters worse by creating integration overhead and introducing the very risk you bought Workday to eliminate.

Get the help you need without sacrificing control or visibility

OneSource Virtual's (OSV) Managed AP is a fully managed service that operates inside your Workday tenant. A named AP representative and our proprietary OCR technology work together to handle:

- Invoice capture
- Coding
- Exception resolution
- Vendor management

Your approval authority doesn't change, nor does your visibility in Workday.

We own the execution. Your team owns the strategy.

Your AP team has more to do than chase exceptions and manually key invoices. OSV handles the volume and noise so your people can focus on vendor relationships, escalations, and the strategic work that requires their judgment.

Up to 99.6%

Your data stays where it belongs, inside Workday

Every other approach, such as software tools, middleware, and in-house bolt-ons, requires your data to move outside Workday. That means sync issues, data silos, and reconciliation risk between systems. Because OSV operates natively within your tenant, Workday remains your single source of truth.

Sync issues

Data silos

Accurate reporting you can trust

OSV's combination of AI/ML extraction and dedicated human validation delivers **up to 99.6% accuracy with 15 quality touchpoints on every invoice**. Dynamic coding captures line-item detail that feeds directly into Workday's reporting engine, giving you financial visibility.

A named representative who knows your business

You're not routed to a help desk. Your dedicated OSV AP representative learns your coding structure, approval workflows, and supplier database. They work inside your Workday tenant every day to handle invoice centralization, extraction, PO pairing, and exception resolution.

"OSV is an integral partner for my operations. It's important for me to make sure my lights stay on at Unum. Having OSV to help me make payments in an effective and efficient manner is crucial for our operations."

Director of Procure-to-Pay Operations, Unum
